

SIZING FORM

Sizing Information

The Man Pan is custom-manufactured and trimmed by CNC tools to meet the end user's dimensions. Just provide the frame and cover dimensions shown below and **a photo of the underside of the manhole cover to be used**. We want to be sure that support and stabilizing structures on the underside of the cover do not interfere with a proper fit.

- Flat lids will not have 'C' and 'D' dimensions.
- Use this Sizing Form or provide factory drawings.
- Please provide a photo of the underside of the cover.

Please provide a photo of the underside of the cover.
